JBT Marel

Non-GAAP and Forward-Looking Statements

Non-GAAP Measures and Reconciliations to GAAP Measures

Adjusted EBITDA, Adjusted EBITDA margin, Adjusted income, Adjusted diluted earnings per share ("Adjusted EPS"), and Free cash flow are non-GAAP financial measures. JBT Marel provides non-GAAP financial measures in order to increase transparency in our operating results and trends. These non-GAAP measures eliminate certain costs or benefits from, or change the calculation of, a measure as calculated under U.S. GAAP. By eliminating these items, JBT Marel provides a more meaningful comparison of our ongoing operating results, consistent with how management evaluates performance. Management uses these non-GAAP measures in financial and operational evaluation, planning and forecasting. These calculations may differ from similarly-titled measures used by other companies. The non-GAAP financial measures disclosed are not intended to be used as a substitute for, nor should they be considered in isolation of, financial measures prepared in accordance with U.S. GAAP. Reconciliations of non-GAAP financial measures can be found in the supplemental schedules to this presentation. Also note that a reconciliation of certain forward-looking non-GAAP measures, including Adjusted EBITDA margin, to the most directly comparable GAAP measures is not provided because comparable GAAP measures for such measures are not reasonably accessible or reliable due to the inherent difficulty in forecasting and quantifying measures that would be necessary for such reconciliation. We are not, without unreasonable effort, able to reliably predict the impact of adjustment items including, but not limited to, restructuring charges, M&A related costs, depreciation and amortization, interest expense and capital expenditures. In addition, we believe such a reconciliation would imply a degree of precision and certainty that could be confusing to investors. These items are uncertain, depend on various factors and may have a material impact on our future GAAP results.

Forward-Looking Statements

This presentation contains forward-looking statements as defined in the Private Securities Litigation Reform Act of 1995. Forward-looking statements are information of a non-historical nature and are subject to risks and uncertainties that are beyond JBT Marel's ability to control. The inclusion of this forward-looking information should not be regarded as a representation by us or any other person that the future plans, estimates or expectations contemplated by us will be achieved. These forward-looking statements include, among others, statements relating to our business and our results of operations, our strategic plans, our restructuring plans and expected cost savings from those plans and our liquidity. The factors that could cause our actual results to differ materially from expectations include, but are not limited to, the following factors: fluctuations in our financial results; termination or loss of major customer contracts and risks associated with fixed-price contracts, particularly during periods of high inflation; catastrophic loss at any of our facilities and business continuity of our information systems; loss of key management and other personnel; our ability to remediate the material weaknesses relating to the Marel financial statements; deterioration of economic conditions, including impacts from supply chain delays and reduced material or component availability; unanticipated delays or acceleration in our sales cycles; inflationary pressures, including increases in energy, raw material, freight, and labor costs; changes in food consumption patterns; weather conditions and natural disasters; impacts of pandemic illnesses, food borne illnesses and diseases to various agricultural products; work stoppages; customer sourcing initiatives; competition and innovation in our industries; disruptions in the political, regulatory, economic and social conditions of the countries in which we conduct business; changes to tariffs, trade regulations, quotas, or duties; potential liability arising out of the installation or use of our systems; the impact of climate change and environmental protection initiatives; our ability to comply with U.S. and international laws governing our operations and industries; increases in tax liabilities; risks related to acquisitions, such as our ability to integrate the acquisitions we have consummated, including the integration of the legacy businesses of JBT and Marel; our ability to develop and introduce new or enhanced products and services and keep pace with technological developments; difficulty in developing, preserving and protecting our intellectual property or defending claims of infringement; cybersecurity risks such as network intrusion or ransomware schemes; our convertible note hedge and warrant transactions; the maintenance of two stock exchange listings; fluctuations in currency exchange rates and interest rates; our level of indebtedness; availability of and access to financial and other resources; and the factors described under the captions "Risk Factors" and "Management's Discussion and Analysis of Financial Condition and Results of Operations" in our most recent Annual Report on Form 10-K and any future Quarterly Report on Form 10-Q. If one or more of those or other risks or uncertainties materialize, or if our underlying assumptions prove to be incorrect, actual results may vary materially from what we projected. Consequently, actual events and results may vary significantly from those included in or contemplated or implied by our forward-looking statements. The forward-looking statements included in this presentation are made only as of the date hereof, and we undertake no obligation to publicly update or revise any forward-looking statement made by us or on our behalf, whether as a result of new information, future developments, subsequent events or changes in circumstances or otherwise.

JBT Marel at a Glance

JBTM

Countries with Installed Base:

100+

Manufacturing, Distribution Locations[1]

50+ ➡ 40+

TTM Revenue as of 9/30/26:

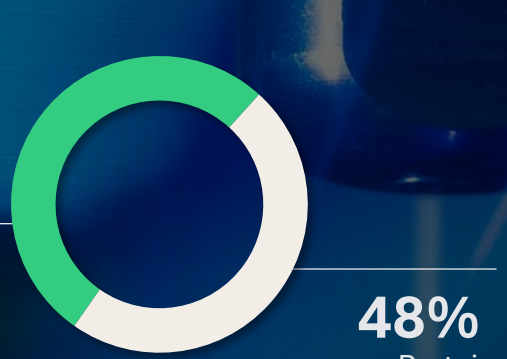

~$3.9B

TTM Adjusted EBITDA Margin[2] as of 9/30/26:

16.6%

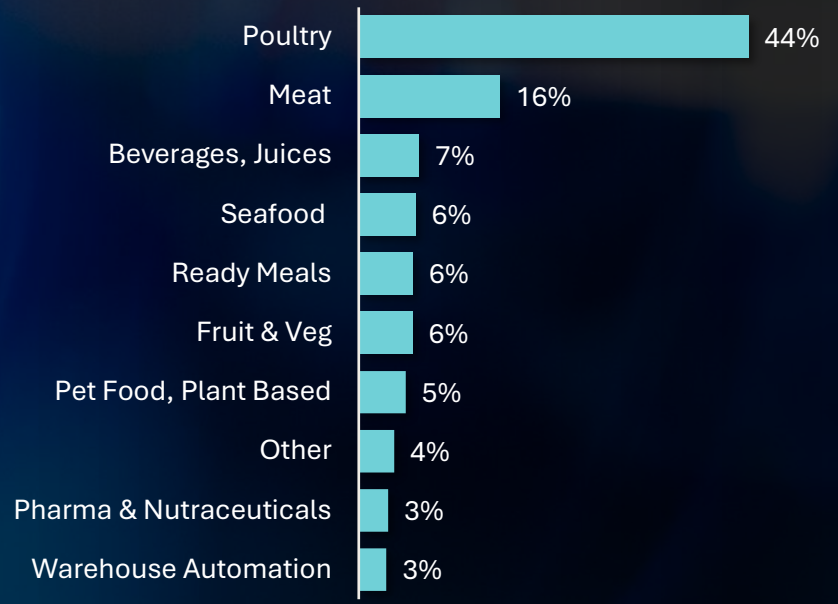

TTM Revenue Breakdown

Diversified End Markets

Full Year 2025 Equipment Orders

› Leading Global Food Technology Provider Built to Transform the Future of Food

Note: TTM represents trailing twelve months reported figures as of September 30, 2026. Figures may have immaterial differences due to rounding.
(1) JBT Marel had 50+ manufacturing and distribution locations as of year-end 2025. With its previously announced footprint optimization efforts, it expects to reduce that number to 40+ by year-end 2027.
(2) Non-GAAP financial measure. Please see appendix for reconciliations.

Integrated Value Proposition to Drive Growth

JBT Marel Segments

Protein Solutions

- Market-leading species-specific technologies and expertise in front end (primary/secondary) solutions
- Spans 3 operating units: Poultry, Meat, and Fish

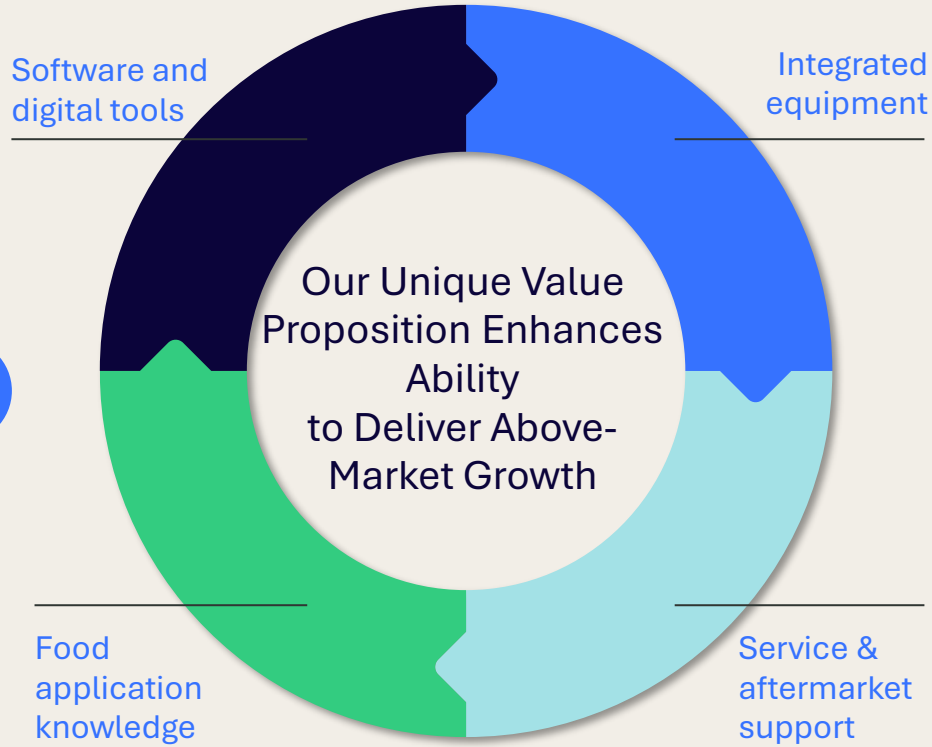

Prepared Food and Beverage Solutions

- Market-leading capabilities in diversified solutions that are further down the line and more end-market agnostic
- Spans 3 operating units: Prepared Foods, Diversified Food & Health, and Warehouse Automated Vehicles

Key Market Growth Drivers

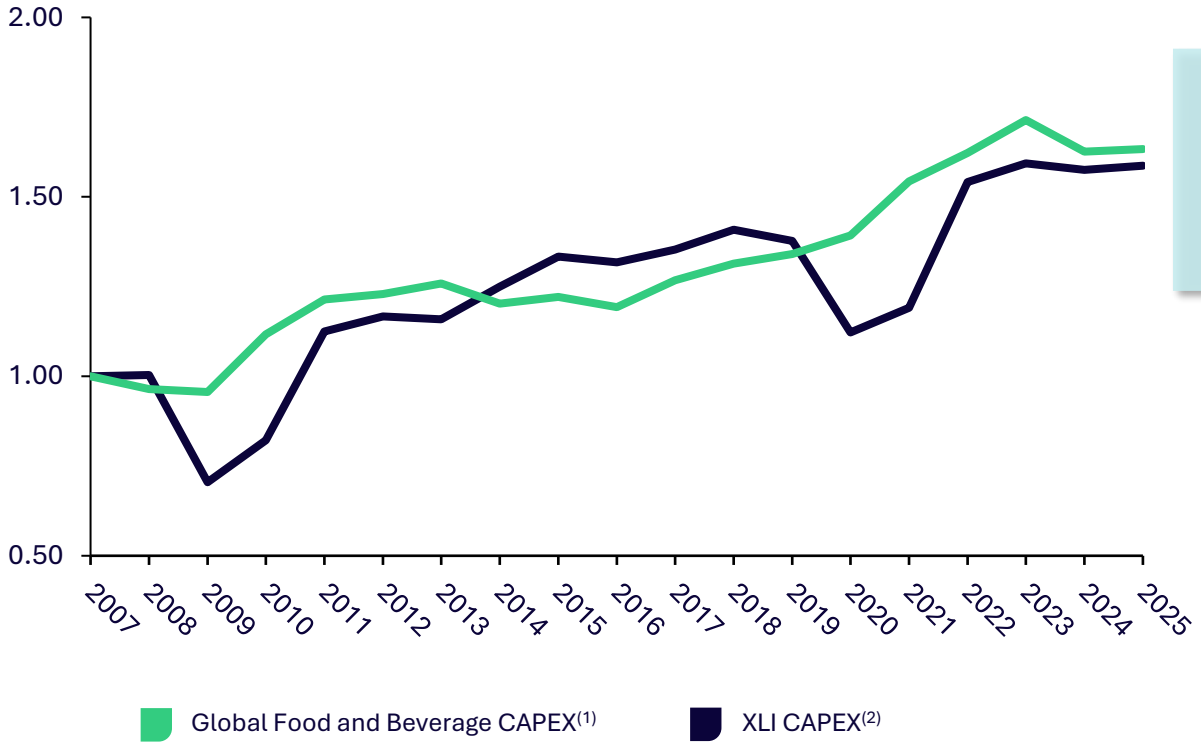

- Constant need for consumers to eat / drink drives market resiliency
- Rising incomes and population growth creates higher demand for protein / prepared food products
- Constantly evolving consumer preferences requires diverse products to meet needs
- Labor scarcity and high-volume operations drives further adoption of automation technology

JBT Marel Value Proposition

Serving an Industry That is Less Cyclical and More Resilient

CAPEX: Food and Beverage vs. Industrials (Indexed as of 2007)[1]

Global F&B CAPEX CAGR ~3% vs. XLI CAPEX of ~2% from 2007 - 2025

Volatility of Food & Beverage CAPEX vs. XLI[1][2]

~2x less volatile

- Food and beverage CAPEX is fundamentally less cyclical than industrial manufacturing
- Investments by food and beverage companies are tied to structural imperatives as consumers need to eat and drink
- This creates more predictable revenue mix and margin profile for JBT Marel

JBT Marel

(1) Source: JBT Marel research and CapIQ. Global food and beverage represents ~50 global food and beverage producers.
(2) XLI includes companies in the XLI: Industrial Sector ETF.

Our NextGen Strategy Enables Further Value Creation

Customer First Service Organization

Integrated Value Proposition

Capture Full Market Potential

Operational Distinctiveness

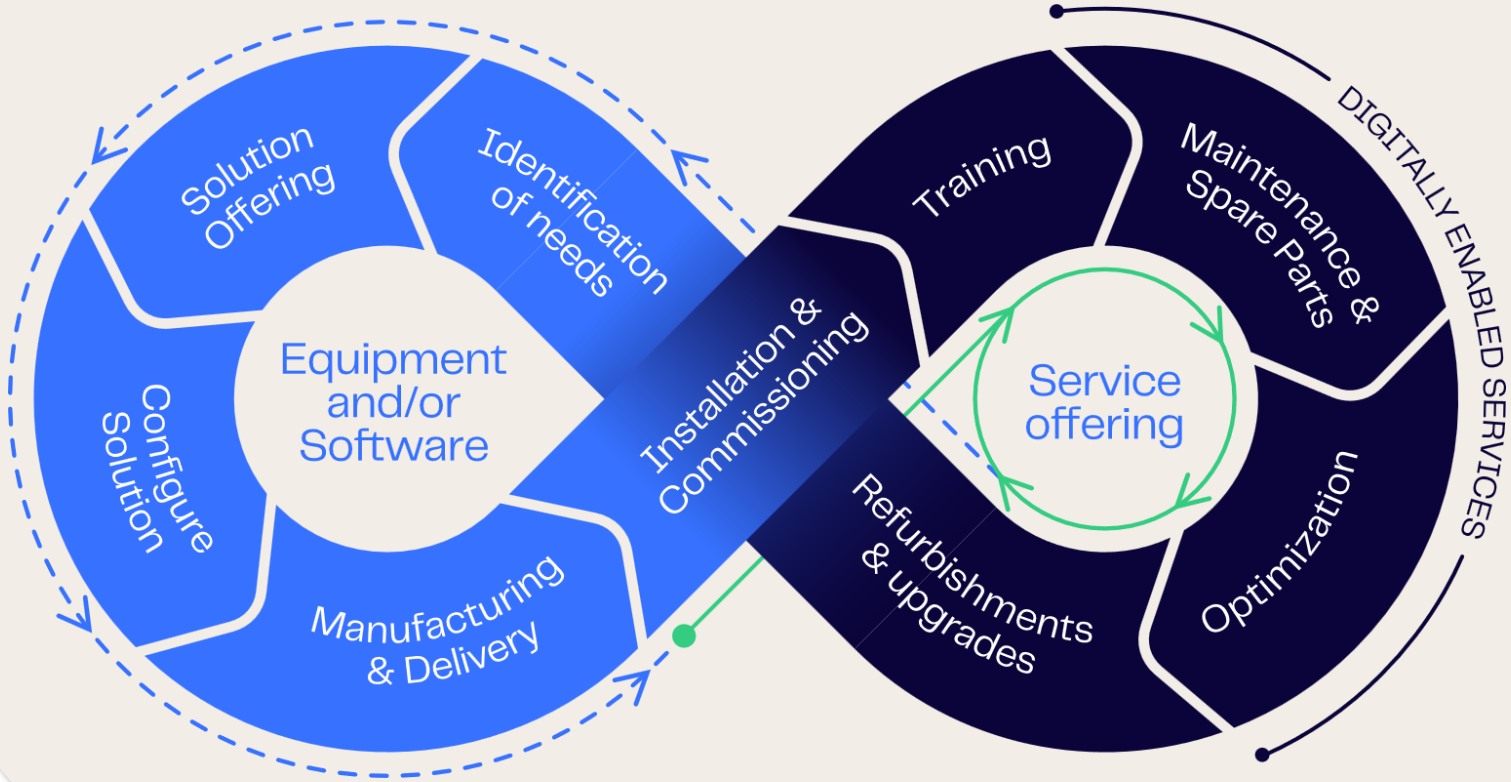

Strategic & Disciplined M&A

Our Strategic Priorities Are Enhanced by Our Operating Model and Core Competencies

Customer First Service Organization

Critical Role of Service and Aftermarket

- High volume customer processes require essential need for uptime and timely service / parts delivery
- Great service builds trusts and ultimately strengthens equipment sales / installed base and increases recurring revenue
- Digitally enabled services, such as prescriptive maintenance and remote support, deepen engagement and expand recurring revenue
- We are focused on growing aftermarket share of wallet from ~40% to 50%+ through increased customer-centric initiatives (multi-year journey)

Integrated Value Proposition

Differentiated Product and Innovation Leadership

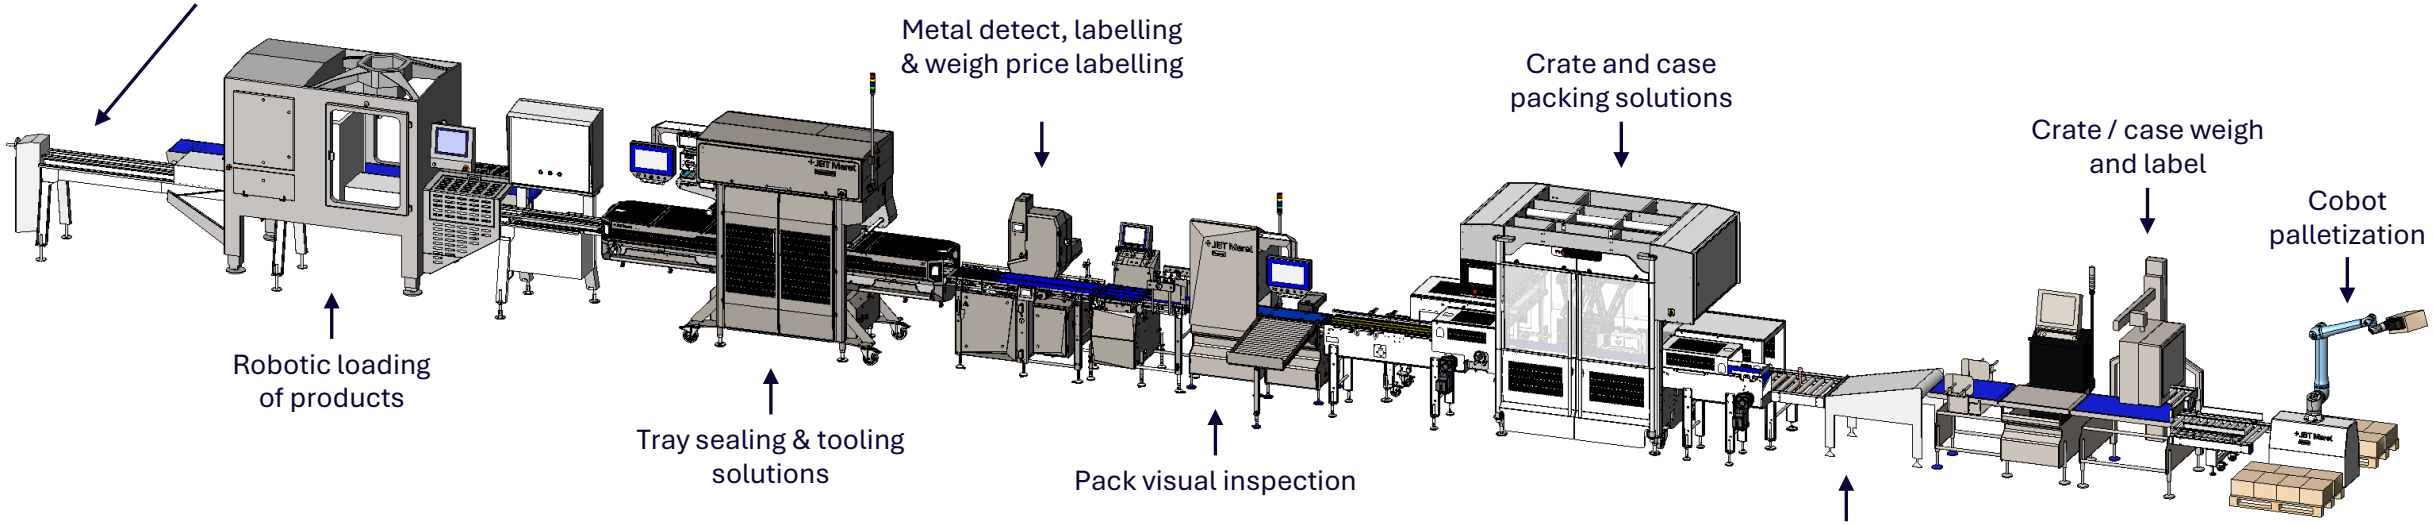

Continued innovation to strengthen offerings in key end markets and reinforce technological leadership

Deliver **solutions that improve yield, throughput, and operational flexibility** while reducing water and energy use

Enhance **integrated equipment that flows seamlessly and operates as cohesive system** for optimized performance

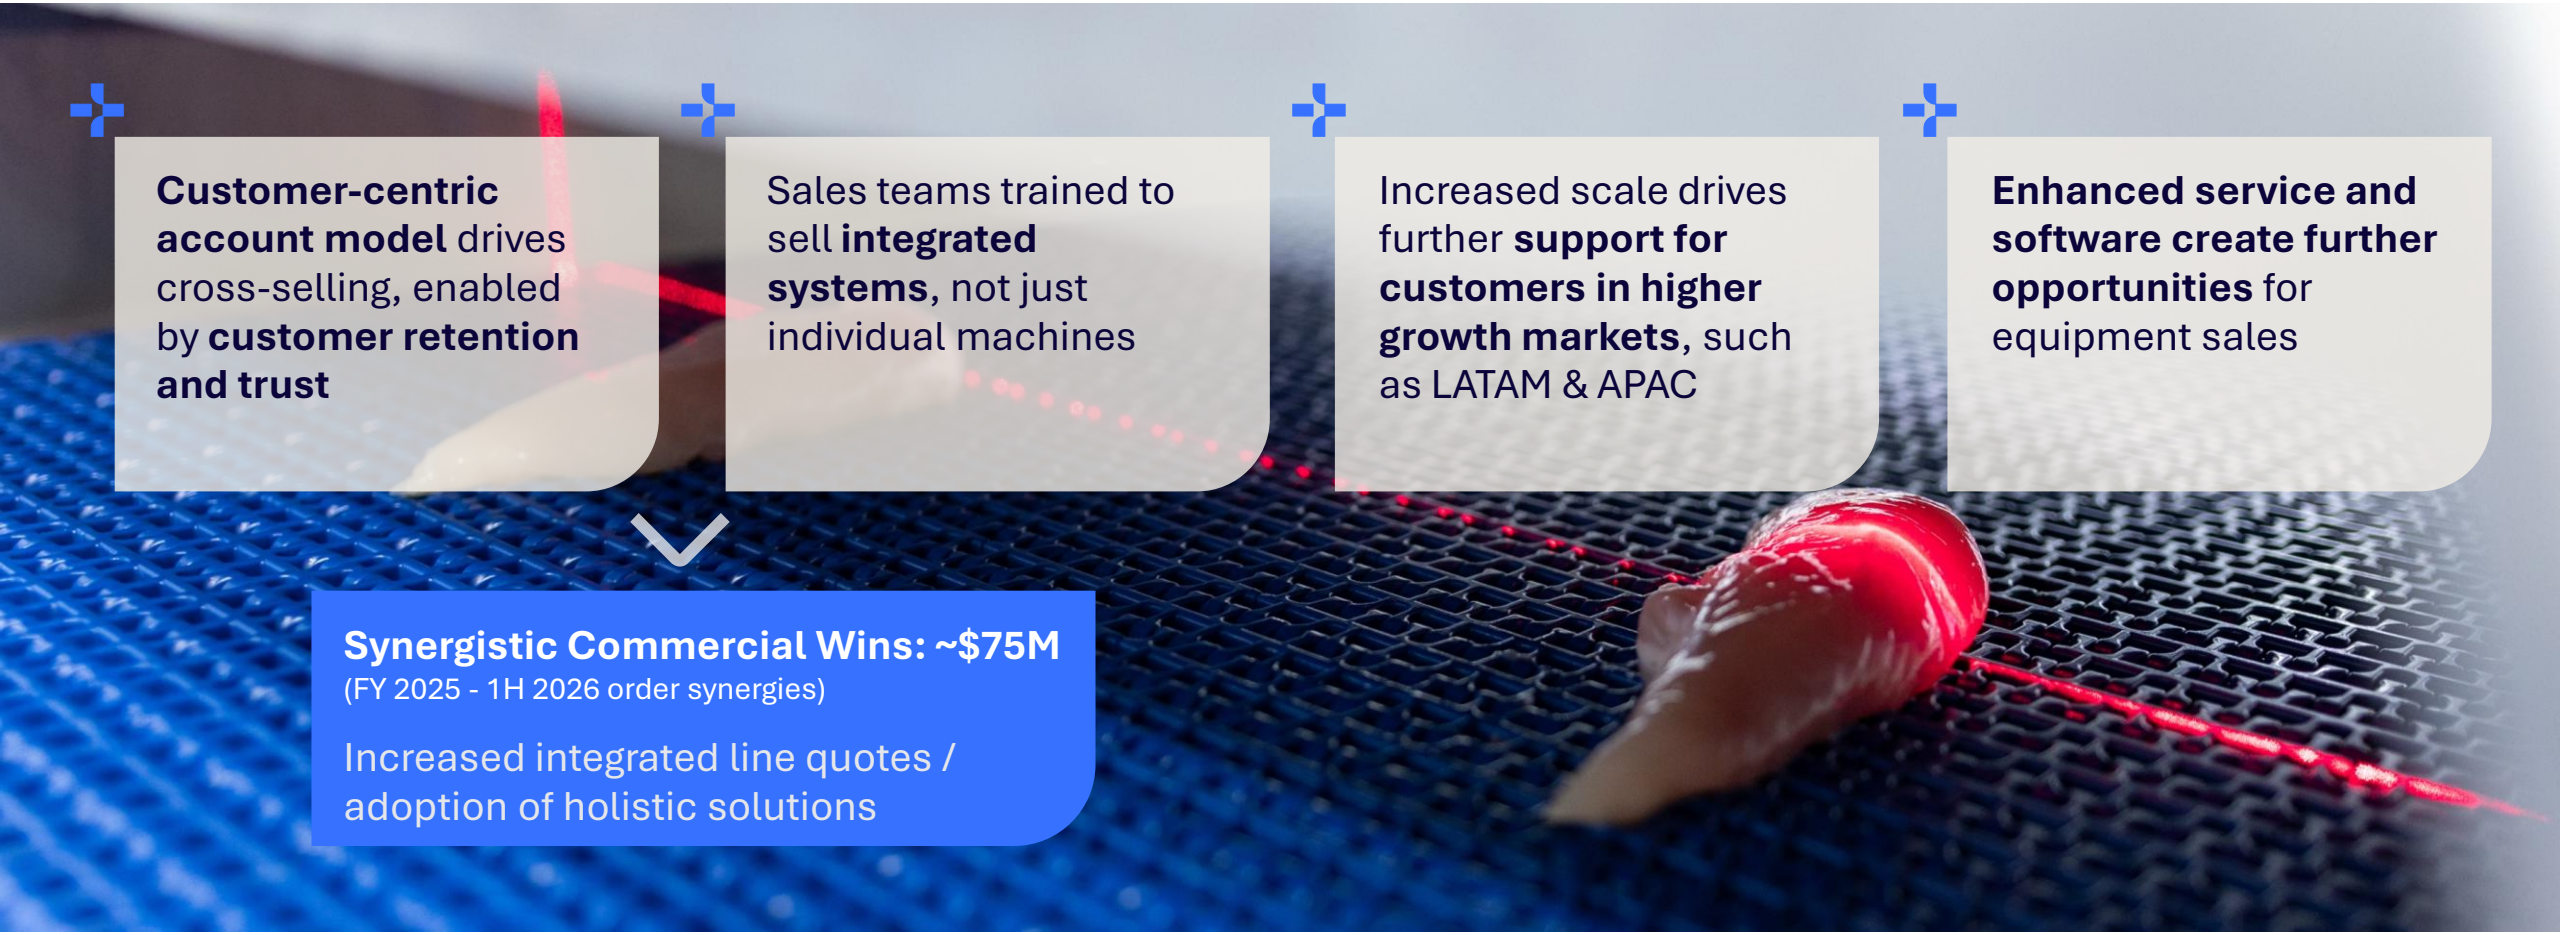

Expand digitally connected services across more solutions to increase uptime and improve performance

Line control, digital quality control, and line performance reporting software solutions

Capture Full Market Potential

Focus on Commercial Execution

Customer-centric account model drives cross-selling, enabled by **customer retention and trust**

Sales teams trained to sell **integrated systems**, not just individual machines

Increased scale drives further **support for customers in higher growth markets**, such as LATAM & APAC

Enhanced service and software create further opportunities for equipment sales

Synergistic Commercial Wins: ~$75M
(FY 2025 - 1H 2026 order synergies)

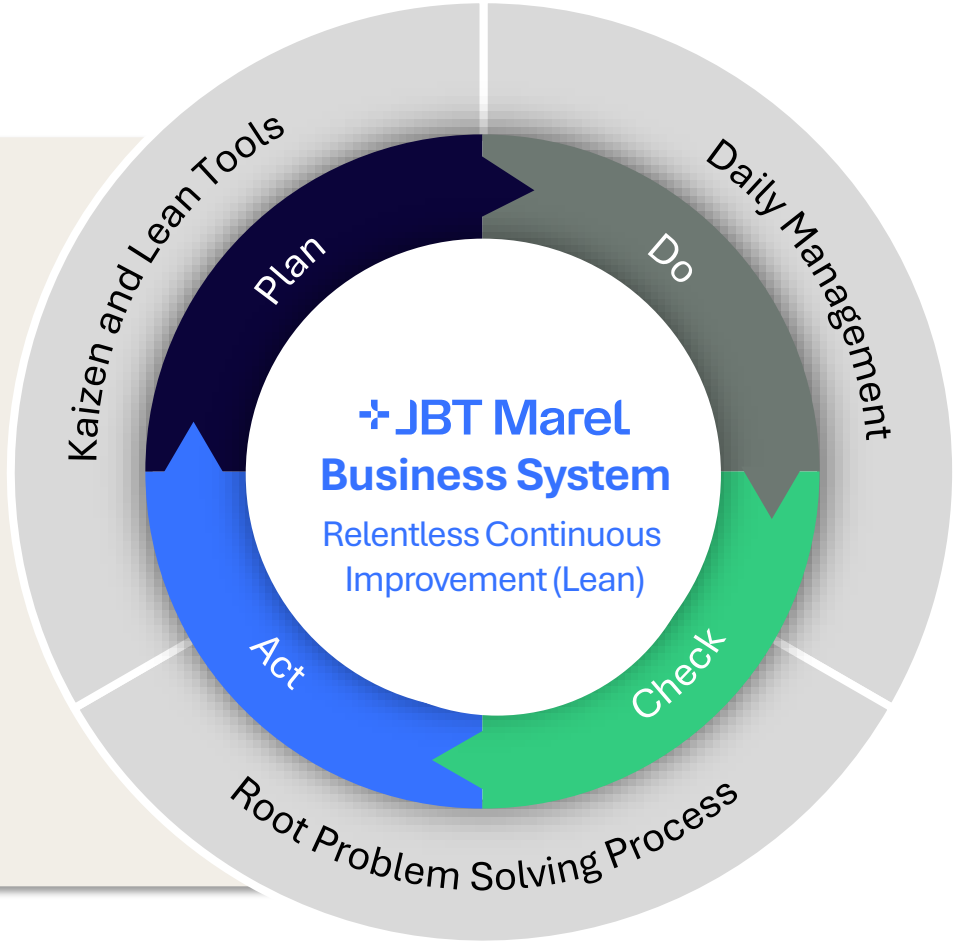

Increased integrated line quotes / adoption of holistic solutions

Operational Distinctiveness

Enterprise Wide Operational Excellence Enables Profitable Growth

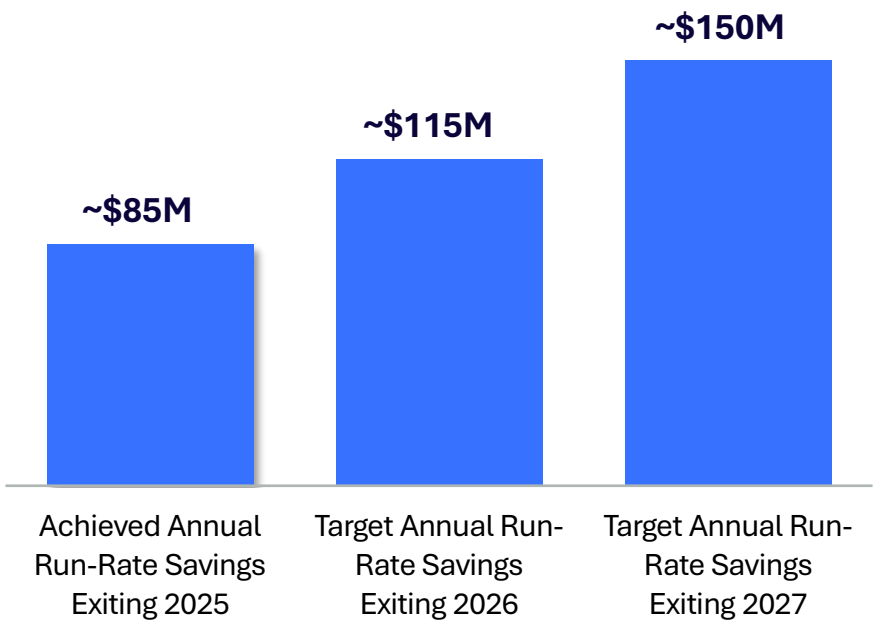

JBT Marel Framework

- **Relentless Continuous Improvement** (RCI) culture to reduce operational complexity and drive efficiency
- **JBT Marel Business System** - a disciplined operating cadence that ties business performance to strategic initiatives and a continuous feedback loop
- **Daily management** tools deployed at the site level, providing a rigorous process to identify root causes and corrective actions
- **Procurement and supply chain excellence**, including value engineering and standardization, supply base consolidation, make-vs-buy rigor, and fit-for-purpose footprint

Executing Multiple Levers to Deliver ~$150M in Expected Realized Cost Synergy Savings for FY 2028

Run-Rate Cost Synergy Savings

In-Year Cost Synergy Savings Through 2028 ($M)

	2025	2026E	2027E	2028E	Total
OPEX	$24	~$22	$10 - $15	~$5	$60 - $65
COGS	$19	~$35	$25 - $30	$7 - $10	$85 - $95
Total	$43	~$57	$35 - $45	$12 - $15	~$150
Footprint		*~$6*	*$12 - $15*	*~$8*	*$25 - $30*

- On-track to deliver target realized cost synergy savings of ~$150M for FY 2028 in a highly inflationary environment
- Due to the evolving trade / inflationary environment, certain supply chain savings are being augmented with accelerated footprint consolidation efforts, allowing us to achieve our target cost synergy savings of ~$150M
- OPEX savings to date include reduced back-office overlap, streamlined systems, and consolidated third party contracts to realize OPEX savings while preserving critical commercial and technology resources and investments
- COGS savings to date include consolidated suppliers for logistics and direct materials and initial footprint rationalization benefits; footprint savings are included in both OPEX and COGS with weight toward COGS

JBT Marel

Note: Figures may have immaterial differences due to rounding.

Phased Approach to Key Footprint Optimization, Allowing Team to Focus on Critical Planning and Execution

Key Milestone Achieved

- Closed 5 manufacturing, distribution, and service facilities as of 09/30/2026, including 1 larger facility and 4 smaller locations
- Improved facility productivity compared to Q2 2026 as part of transitioning products to lower-cost, higher productivity operations

Execution Underway

- Began consolidating two adjacent DF&H[(1)] pet food equipment facilities in Kansas; consolidation expected to be complete in Q1 2027
- Initiated movement of certain spare-parts inventory to the global distribution centers in Buford, GA and Eindhoven, Netherlands
- Operational plans to increase Slovakia facility production by ~20% per year in 2026 & 2027

2027 Areas of Focus

- Consolidate, in phases, two higher-cost DF&H[(1)] manufacturing locations into lower-cost, higher productivity operations; these facilities already manufacture the products that are being transferred
- Continue transitioning certain product line production and spare parts fulfillment to take advantage of capacity and productivity in low-cost manufacturing facilities and our high-tech Eindhoven, NL distribution facility

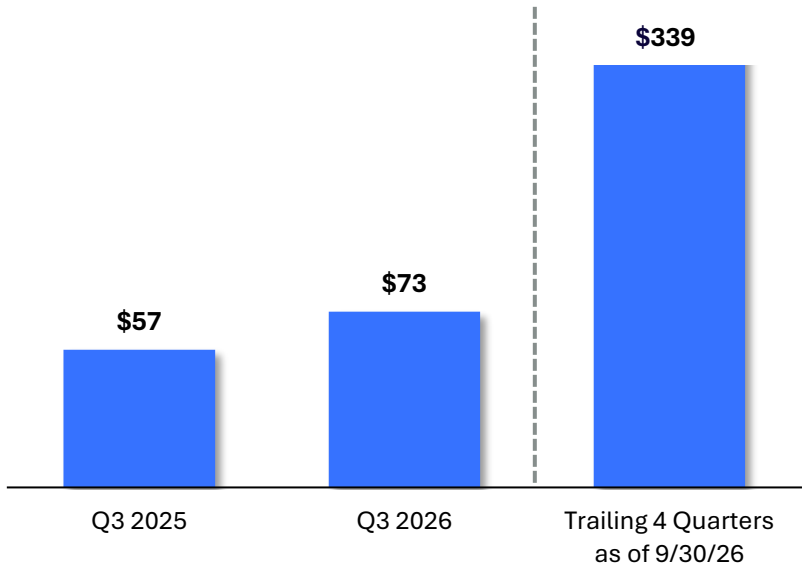

> 2026 & 2027 Initiatives Are Expected to Reduce Manufacturing & Distribution Space by ~1.1M Square Feet & Office Space by ~0.2M Square Feet

(1) The DF&H acronym represents the Diversified Food & Health businesses that sits within the PFB segment.

Strong Free Cash Flow Performance & Returns-Based Approach to Capital Allocation

Free Cash Flow[(1)] Performance

($ in millions)

FCF Conversion as % of Adj. EBITDA[(1)]	*33%*	*41%*	*52%*

Capital Allocation Actions

- During Q3 2026, repurchased ~800,000 shares for ~$94M
- Strong quarterly free cash flow allowed us to maintain a leverage ratio below 2.5x while opportunistically repurchasing shares
- On October 30, 2026, the Board of Directors increased the existing share repurchase authorization by $500M; total program authorization is now $700M
- Increased share repurchase authorization gives us the ability to utilize strong free cash flow generation to opportunistically repurchase shares when we believe there is a disconnect between the stock price and the intrinsic value of JBT Marel
- Expect opportunistic share buy backs to be balanced to maintain leverage ratio within desired long-term range of 2.0 – 2.5x

JBT Marel

Note: Figures may have immaterial differences due to rounding.
(1) Non-GAAP measure. Please see appendix for reconciliations.

Why Invest in JBT Marel

Executing transformation	Unlocking value with clear strategic priorities and strong execution against integration/synergy plan
Compelling market exposure	Positioned in large, resilient, and growing food and beverage markets supported by long-term trends
Differentiated value proposition	Unmatched, integrated ecosystem driving customer loyalty and growth opportunities
Resilient recurring revenue	Approximately half of revenue generated from predictable aftermarket parts/service with strong margins
Operational excellence	Continuous improvement and lean initiatives underpinning margin expansion
Delivering shareholder value	Significant opportunity for continued revenue growth, margin expansion, and robust free cash flow generation

Non-GAAP Financial Measures

The non-GAAP financial measures presented in this report may differ from similarly-titled measures used by other companies. The non-GAAP financial measures are not intended to be used as a substitute for, nor should they be considered in isolation of, financial measures prepared in accordance with U.S. GAAP.

- *Adjusted EBITDA and Adjusted EBITDA margin:* We define Adjusted EBITDA as earnings before income taxes, interest expense (income), net, other financing income, pension expense other than service cost, restructuring costs, M&A related costs, including acquisition and integration-related expenses, one-time impairment charges, and depreciation and amortization, including acquisition-related depreciation and amortization. We define Adjusted EBITDA margin as Adjusted EBITDA divided by revenue.

- *Adjusted income and Adjusted diluted earnings per share from continuing operations:* We adjust earnings for restructuring costs, M&A related costs, including acquisition and integration-related expenses, one-time impairment charges, inventory step-up amortization from business combinations; acquisition-related amortization and depreciation, acquisition financing costs, non-cash service pension costs and the related tax effects of these adjustments.

- *Free cash flow:* We define free cash flow as cash provided by continuing operating activities, less capital expenditures, plus proceeds from sale of fixed assets and pension contributions.

- *ROIC:* ROIC takes our tax affected EBITA divided by average invested capital.

Presentation of Percentages: Effective in 2026, percentage amounts presented in this presentation have been calculated using rounded figures. In prior periods, percentage amounts were calculated using the unrounded underlying values rather than the rounded figures presented. As a result, certain percentage amounts in this section may differ slightly from percentages calculated using the figures presented in the Company's Condensed Consolidated Financial Statements or the accompanying narrative.

JBT Marel Reconciliation of Net Income to Adjusted EBITDA

(In millions)	TTM as of September 30, 2026	Q3 2026	Q2 2026	Q1 2026	Q4 2025	Q3 2025
Net income (loss)	$ 196	$ 70	$ 28	$ 45	$ 53	$ 67
Income tax provision (benefit)	48	18	7	15	8	17
Interest expense, net	48	13	13	10	12	22
Other financing (income) [1]	(8)	(1)	(2)	(2)	(3)	(3)
Restructuring and related costs [2]	24	7	12	(2)	7	7
M&A related costs [3]	42	9	11	8	14	6
Impairment of intangible assets [4]	33	-	33	-	-	-
Pension expense, other than service cost [5]	1	-	-	-	1	-
Depreciation and amortization [6]	265	63	66	68	68	55
Adjusted EBITDA	$ 651	$ 179	$ 168	$ 142	$ 161	$ 171
Total revenue	$ 3,919	$ 994	$ 981	$ 936	$ 1,008	$ 1,001
Net income (loss) margin	*5.0%*	*7.0%*	*2.9%*	*4.8%*	*5.3%*	*6.7%*
Adjusted EBITDA margin	*16.6%*	*18.0%*	*17.1%*	*15.2%*	*16.0%*	*17.1%*

(1) Other financing income represents transaction gains from fair value hedges on our foreign currency denominated debt, which are considered non-operating as they relate to our cost of borrowing on this debt.

(2) Costs associated with restructuring actions, primarily consisting of severance and related employee costs.

(3) Advisory, strategy, integration, and other costs associated with completed M&A transactions. These costs are attributable to the integration of acquired businesses and are not considered indicative of ongoing operating performance.

(4) Non-cash impairment charge related to acquired intangible assets recorded in the second quarter of 2026.

(5) Non service-related pension expense, which consists of non-cash interest cost, expected return on plan assets, amortization of actuarial gains and losses, and settlement charges.

(6) Depreciation and amortization, including acquisition related amortization and depreciation expense, is excluded to determine Adjusted EBITDA.

The above table reports Adjusted EBITDA and Adjusted EBITDA margin, which are non-GAAP financial measures. We use Adjusted EBITDA and Adjusted EBITDA margin internally to make operating decisions and believe that Adjusted EBITDA is useful to investors as a measure of the Company's operational performance and a way to evaluate and compare operating performance against peers in the Company's industry.

JBT Marel Reconciliation of Cash Provided by Operating Activities to Free Cash Flow (FCF)

(In millions)	TTM as of September 30, 2026 [1]	Q3 2026	Q2 2026	Q1 2026	Q4 2025	Q3 2025
Cash provided by operating activities	$ 438	$ 99	$ 102	$ 119	$ 118	$ 87
Less: Capital expenditures	$ 111	26	25	26	34	31
Plus: Proceeds from disposal of assets	$ 11	-	2	7	2	-
Plus: Pension contributions	$ 1	-	-	-	1	1
Free cash flow	$ 339	$ 73	$ 79	$ 100	$ 87	$ 57

(1) Trailing Twelve Months (TTM) represents the Company's performance over the most recent twelve-month period.
